Course End Project Problem Statement

# Course End Project: ChatGPT-Based Storytelling

**Problem Scenario:** Create an interactive storytelling adventure using ChatGPT, where you can create unique and engaging narratives without requiring any coding or additional platforms.

**Objective:** Unleash your creativity and storytelling abilities by using ChatGPT as a tool to collaboratively build an interactive story.

**Steps to Perform:**

1. Define the story theme:
    a. Choose a theme or genre for the storytelling adventure, such as fantasy, science fiction, mystery, or adventure

2. Introduce the main characters:
    a. Create character descriptions, including their names, personalities, and backgrounds

3. Begin the story:
    a. Set the scene and introduce a starting point to kickstart the story

4. Participant input:
    a. Pose questions or describe the actions of their chosen characters

5. AI-generated responses:
    a. Utilize ChatGPT to provide narrative responses based on your inputs
    b. Expand the story and advance the plot based on your ideas

6. Decision-making and branching paths:
    a. Prompt to make decisions or pose choices within the story
    b. Use ChatGPT's responses to guide your next steps, leading to different story paths and outcomes

7. Iteration and refinement:
    a. Refine your inputs for clarity and consistency

8. Conclusion:
    a. Guide towards a satisfying conclusion as the story progresses
    b. Determine if the adventure will reach an endpoint or be left open-ended for future continuation

9. Showcase and share the story
